Contents Volume 25

Research Papers

A versatile means of intracellular labeling: injection of biocytin and its detection with avidin conjugates (NSM 00840)
K. Horikawa and W.E. Armstrong (U.S.A.) 1

Neural connections identified with PHA-L anterograde and HRP retrograde tract-tracing techniques (NSM 00839)
A.M. Thompson and G.C. Thompson (U.S.A.) 13

A chamber for electrophysiological recording from cultured neurones allowing perfusion and temperature control (NSM 00848)
I.D. Forsythe and R.T. Coates (U.S.A.) 19

Visual receptive fields of local intracortical potentials (NSM 00844)
H. Lohmann, R. Eckhorn and H.J. Reitboeck (F.R.G.) 29

A silver impregnation method for motor and sensory nerves and their endings in formalin-fixed mammalian muscles (NSM 00841)
H. Schweizer and H. Kaupenjohann (F.R.G.) 45

Effects of temperature and temperature gradients on ion-sensitive microelectrodes (NSM 00838)
K.H. Reid, R. Marrannes and A. Wauquier (Belgium) 49

Ultra-low noise silver-plated carbon fibre microelectrodes (NSM 00842)
J. Millar and G.V. Williams (U.K.) 59

The analytic and functional accuracy of a video densitometry system (NSM 00846)
D.L. McEachron, C.R. Gallistel, J.L. Eilbert and O.J. Tretiak (U.S.A.) 63

Comparison between brain paste and polymer [^{125}I]standards for quantitative receptor autoradiography (NSM 00837)
A.P. Davenport and M.D. Hall (U.K.) 75

Quantitation of neurochemically identified neurons in reaggregate tissue cultures (NSM 00836)
A. Heller, P. Kontur, P. Hoffmann and B. Heller (U.S.A.) 83

Basic instrumentation for fast cyclic voltammetry (NSM 00843)
J. Millar and T.G. Barnett (U.K.) 91

Assessment of maximal voluntary contraction with twitch interpolation: an instrument to measure twitch responses (NSM 00849)
J.P. Hales and S.C. Gandevia (Australia) 97

Synaptic currents recorded from the dendritic field of an insect giant interneurone (NSM 00852)
L. Mony, B. Hue and J.-C. Tessier (France) 103

A method for controlled mechanical stimulation of single semicircular canals (NSM 00850)
J.D. Dickman, P.A. Reder and M.J. Correia (U.S.A.) 111

Use of BMDP statistical package to generate maximum likelihood estimates for single channel data (NSM 00854)
R.E. Wachtel (U.S.A.) 121

Identification of afferents in a fine nerve strand by selective elimination of signals from C-fibers by electric current pulses (NSM 00855)
S.V. Revenko, V.V. Ermishkin and L.Y. Selector (U.S.S.R.) 129

A simple glass-coated, fire-polished tungsten electrode with conductance adjustment using hydrofluoridic acid (NSM 00856)
F. Wörgötter and U.T. Eysel (F.R.G.) 135

Head restraint device for chronic recording of neural activity in the awake monkey (NSM 00859)
S.R. Buchholz and E.B. Montgomery Jr. (U.S.A.) 139

Quantitative computer analysis of Golgi-impregnated neurons using a new 'expanded stick' model for coding; its application to the study of axons (NSM 00845)
M. Freire (Spain) 143

Selective silver impregnation of senile plaques: a method useful for computer imaging (NSM 00847)
J.C. Hedreen, L.S. Raskin, R.G. Struble and D.L. Price (U.S.A.) 151

A simple method for combining HRP-TMB histochemistry with tritiated thymidine autoradiography on the same tissue section (NSM 00851)
K.N. Nandi, J.A. Beal and D.S. Knight (U.S.A.) 159

0165-0270/88/$03.50 © 1988 Elsevier Science Publishers B.V. (Biomedical Division)

Simple microcomputer system for mapping tissue sections with the light microscope (NSM 00858)
A. Alvarez-Buylla and D.S. Vicario (U.S.A.) 165
Anterograde and retrograde axonal transport of *Phaseolus vulgaris* leucoagglutinin (PHA-L) from the globus pallidus to the striatum of the rat (NSM 00857)
S.Y. Shu and G.M. Peterson (U.S.A.) 175
Unsupervised waveform classification for multi-neuron recordings: a real-time, software-based system. I. Algorithms and implementation (NSM 00860)
M. Salganicoff, M. Sarna, L. Sax and G.L. Gerstein (U.S.A.) 181
Unsupervised waveform classification for multi-neuron recordings: a real-time, software-based system. II. Performance comparison to other sorters (NSM 00861)
M.F. Sarna, P. Gochin, J. Kaltenbach, M. Salganicoff and G.L. Gerstein (U.S.A.) 189
Piriform cortex brain slices: techniques for isolation of synaptic inputs (NSM 00864)
N. Hori, N. Akaike and D.P. Carpenter (U.S.A., Japan) 197
A simple method for recording and analysing circadian rhythms in man (NSM 00866)
M. Mirmiran, J. Overdijk, W. Witting, A. Klop and D.F. Swaab (The Netherlands) 209
Stabilization of tetramethylbenzidine (TMB) reaction product at the electron microscopic level by ammonium molybdate (NSM 00862)
C.F. Marfurt, D.F. Turner and C.E. Adams (U.S.A.) 215
In vivo visualization of callosal pathways: a novel approach to the study of cortical organization (NSM 00863)
R. Malach (Israel) 225
A non-traumatic approach to ventral subarachnoid space near circle of Willis (NSM 00865)
P.S. Lacy (U.S.A.) 239
The effects of various methods of sacrifice and of ethanol on adenosine levels in selected areas of rat brain (NSM 00853)
M. Clark and M.S. Dar (U.S.A.) 243
A multipurpose vertical holeboard with automated recording of spatial and temporal response patterns for rodents (NSM 00871)
I.H. Iversen and J. Mogensen (U.S.A., Denmark) 251
